// Online Java Compiler
// Use this editor to write, compile and run your Java code online
import java.util.*;
class HelloWorld {
    public static void main(String[] args) {
        //int min=2,max=10,step=2;
        Scanner sc= new Scanner(System.in);
        System.out.println("Enter the min value:");
        int min=sc.nextInt();
        System.out.println("Enter the max value:");
        int max= sc.nextInt();
        System.out.println("Enter the step value:");
        int step = sc.nextInt();
        ArrayList<Integer>al = new ArrayList<Integer>();
        if(step>0){
            for(int i=min;i<=max;i=i+step){
                al.add(i);
            }
        }
        System.out.print(al);
    }
}
```

```
java -cp /tmp/TS8cDONwz6 HelloWorld
Enter the min value:
1
Enter the max value:
10
Enter the step value:
3
[1, 4, 7, 10]
```
